About the V Foundation for Cancer Research

The V Foundation accelerates breakthroughs in cancer research by funding bold, cutting-edge programs. We carefully seek and vet the best research being performed by the brightest scientists. The V Foundation is a major player in the successes of cancer research over the past two decades—successes that have given longer lives and improved outcomes for hundreds of thousands of people with cancer. We are a family committed to achieving Victory Over Cancer®.

V Foundation events are managed by Don't Ever Give Up, Inc., a 501 (c)(3) charitable supporting organization formed by and operated exclusively for the benefit of the V Foundation. v.org/degu
