

## The Endowment Fund

Help sustain our 100% promise, only made possible by the existence of a strong endowment.

The V Foundation acts like a venture capitalist of cancer research by funding high-risk, high-reward research projects. Researchers will be the ones to accelerate progress and to ultimately save more lives.

The **ENDOWMENT** fuels the engine of innovation and progress in cancer research.

More than **\$225M** in cancer research grants has been contributed by the V Foundation.

**Survival Rates** for many cancers continue to increase.

There are nearly **17M** **CANCER SURVIVORS** in the U.S. today.

The **Endowment** ensures accelerated research will continue to change the course of cancer.

Critical to this mission is our continued ability to award **100 cents on the dollar** to research. It provides a powerful incentive for the next generation of donors to give, allowing even **more cutting-edge research** to be funded.

Invest with us in our shared goal to achieve **Victory Over Cancer®**.
