

The Stuart Scott Memorial Cancer Research Fund

Stuart Scott, a dedicated friend of the V Foundation, helped raise funds for the organization for 20+ years, beginning long before 2007, when he was diagnosed with cancer.

Funded **RESEARCH PROJECTS** include prostate, colorectal, breast, endometrial and lung cancers.

24 grants have been awarded at 18 cancer centers since the fund started in 2015.

Research is dedicated to the aggressiveness, therapeutic responsiveness and ultimate outcomes experienced by cancer patients from **diverse ethnic populations**.

The V Foundation has awarded nearly **\$8 million** from the Stuart Scott Memorial Cancer Research Fund. The groundbreaking minority cancer research initiative funds **outstanding minority researchers** and also research that explores the biology behind why some cancers are more likely to occur, more aggressive or harder to treat in some **minority populations**.

Visit www.jimmyv.org/stuartscott to make a donation in Scott's memory.
