Its really amazing 100 percent fast free and legit can t believe how many followers i gained thank you mr insta is the place to go love it so much that s amazing application that s simple to use and fast fast fast for had folwer on your instagram

Instagram engagement is a comprehensive rate that consists of broad metrics including the number of instagram followers instagram likes instagram comments instagram views and so on more instagram followers imply greater interaction and engagement with your account this brings a high reach out and turns your account to the next level

It s the sad truth that most new instagram profiles have a hard time getting noticed before they are able to gain a significant following in some professions like the fashion industry models won t even be considered for hire if they don t have a certain number of followers the reason being most brands want to hire people who are well known in their field for that kind of work this can put up and coming models at an extreme disadvantage when trying to get discovered

More Information

Some people mistakenly think that the most important factor for social media success is the number of followers somebody has so they try to take a shortcut to their success

and pay to buy followers they equate the number of followers you display with your level of popularity

So you're wondering how socialfollow works because we sound too good to be true getting free followers on instagram without survey or sketchy tricks is impossible nowadays but we make it possible

Get free instagram followers the easy way you won't need to fill out a survey and you don't need to give anyone your instagram password and when we say free we mean it try it now

Always catching users' interests is the important point to maintain your free followers instagram your followers often want to see a specific type of content from you so you can choose topics that can resonate with your instagram followers for example if you run a music account you should pay attention to the hot music topics appearing recently and post the content that can arouse the instagram users' hot discussion

Similarly you should look at a potential influencer's engagement rate a quality influencer will have engagement likes and comments of about 1/5-3% of their followers e.g. if an influencer has 100,000 followers you should see 1,500-3,000 likes and comments combined on an average post an engagement rate of 1 percent is okay for many influencers depending on their niche if an influencer's engagement rate for his/her posts is regularly well below this you should be suspicious however

It is what we have always done we are a group of people that like to come up with great tools that everyone can use no matter who you are or where you are in the world there is not another social media growth site that can truly say this

Conclusion

Some of the smarter bot accounts and even some of the more dishonest human operated accounts create comments to make them appear genuine the problem is that these comments are generic and lack substance for instance you might spot that an account continually comments good picture or good job

Now you can start building a following our free services help many accounts do this with very little effort we deliver targeted users based on the selections you make when you create an account once you have built up a large enough fan base you can reach out to business owners brands etc to showcase their product or service for a fee
